WHAT IS CLAIMED IS:

- 1 A communication device comprising:
- 2 cut-off frequency switching means for switching a cut-off
- 3 frequency for communication data at a communication line.
- The communication device according to claim 1, wherein said
- 2 cut off frequency switching means is structured to carry out switching
- 3 of a D.C. cut-off capacitor.
- 3. The communication device according to claim 1 or claim 2, further comprising:
 - confirming means for confirming whether or not a communication partner has said cut-off frequency switching means, in advance of sending and receiving of communication data.
- 4. The communication device according to claim 3, wherein said confirming means is structured such that switching control of said cut-off frequency switching means is carried out in accordance with results of confirmation.
 - 5. The communication device according to any of claims 1 through 4, wherein the communication line is a telephone line, and said communication device is a modem.
- 6. The communication device according to claim 5, wherein xDSL (x Digital Subscriber Line) type communication, which carries out data communication via the telephone line, is carried out.
